Date Issued: Sept. 28, 2007

**BERING SEA TANNER CRAB FISHERY OPENS OCTOBER 15,  
TOTAL ALLOWABLE CATCH ANNOUNCED**

The Alaska Department of Fish and Game (ADF&G) and National Marine Fisheries Service (NMFS) have completed analysis of NMFS trawl survey data for the Bering Sea Tanner crab stock. The Bering Sea Tanner crab stock is above the minimum mature female biomass threshold of 21.0 million pounds.

The Bering Sea District Tanner crab stock is managed east and west of 166° W longitude, with a separate total allowable catch (TAC) for each area. There is no minimum total allowable catch (TAC) for Bering Sea District Tanner crab. The department calculated the TAC east of 166° W long. using a 10% harvest rate applied to the molting mature male abundance. West of 166° W long., the TAC was calculated using a 50% harvest rate applied to the exploitable legal-male abundance estimate. The 2007/08 Bering Sea District Tanner crab TACs are summarized as follows:

IFQ - East	3,100,500 pounds
CDQ - East	344,500 pounds
Total - East	3,445,000 pounds

IFQ - West	1,958,400 pounds
CDQ - West	217,600 pounds
Total - West	2,176,000 pounds

In the area west of 166° W long., waters enclosed by 168° W long. to 170° W long. and 57° N lat. to 58° N lat. (ADF&G statistical areas 685700, 685730, 695700, and 695730) will be closed to commercial fishing for Tanner crab to protect the Pribilof blue king crab stock. The majority of blue king crabs captured during the 2007 survey were found in this area.

The 2007/08 Bering Sea Tanner crab fishery will open at 12:00 noon on October 15, 2007 and will remain open through March 31, 2008. The pot limit for this fishery is 450 pots per vessel. Buoy tags are

currently available for sale at the Dutch Harbor and Kodiak ADF&G offices. Vessel operators may harvest Tanner crab west TAC and snow crab concurrently by registering for both species west of 166° W long., as well as Tanner crab east TAC and Bristol Bay red king crab by registering for both species east of 166° W long. Between 163° W long. and 166° W long., Tanner crab may only be harvested in the directed Tanner crab fishery. Vessel operators may not concurrently register for Tanner crab fishing east and west of 166° W long. Each vessel operator is restricted to a single species allocation of crab pot gear (450 pots) and must designate at the time of registration the quantity of pot gear registered and the quantity of pot gear configured for each species.

A valid United States Coast Guard (USCG) Commercial Fisheries Safety Decal is required before a vessel registration is issued. Participating vessels must also have an activated vessel monitoring system approved by National Marine Fisheries Service (NMFS).

The operator of a vessel participating in IFQ, or CDQ crab fisheries must notify the USCG at least 24-hours prior to departing port when carrying crab pot gear. USCG can be contacted at: 1-800-478-5555.

Preseason gear inspections will be available in Dutch Harbor, Akutan and King Cove beginning on October 10, 2007. Vessel registration will begin at 12:00 noon on October 13, 2007. An individual holding a current Commercial Fisheries Entry Commission (CFEC) Bering Sea Tanner crab interim use permit card (T91Q or T09Q) must be aboard the vessel when it is registered. Vessels may fish concurrently for IFQ and CDQ crab, but a separate registration and CFEC permit card is required for each fishery. At the time of registration, all pots onboard the vessel or in wet storage must be in compliance with current Bering Sea commercial Tanner crab fishing regulations.

Vessels participating in IFQ or CDQ fisheries may form gear operation cooperatives. Each vessel must register those vessels authorized to operate the vessel's gear at the time of registration. When a vessel transports crab pot gear to the fishing grounds for another vessel, the vessel owning the crab pot gear must be active within seven days in the registration area where the crab pot gear is deployed.

Vessel operators shall notify the department within 72-hours of completing fishing operations in a registration area or when departing the registration area with gear in long-term storage. The Board of Fisheries established a 14-day period when unbaited gear may be stored outside of designated storage areas after fishing is completed. Pots must be removed from the water or placed in long-term storage if left unattended in a registration area for more than a 14-day period. Additionally, a vessel's registration will be invalidated after 14-days of inactivity in a registration area.

For questions regarding issuance of quota share and IFQ/IPQ, contact NOAA Fisheries RAM Division at 1-800-304-4846 (option #2). For questions regarding federal Crab Rationalization Program regulations, contact NOAA Fisheries Sustainable Fisheries Division at (907) 586-7228 or the NOAA Office of Law Enforcement in Kodiak at (907) 486-3298 or Dutch Harbor at (907) 581-2061. For further information on state management contact the Alaska Department of Fish & Game in Dutch Harbor at (907) 581-1239 or in Kodiak, at (907) 486-1840.
